Experience

WEB DEVELOPER | Freelance

December 2014 - Present | Remote

- Recent projects include: Full site redesign for personal trainer website Body by Khoshal
- Worked directly with client to develop site design, ecommerce integration and creative execution
- Built custom UI on Wordpress backend using jQuery for dynamic design

CAL HACKS | Participant

September 2014 | UC Berkeley

- Participated in 36 hour hackathon with 1,400 programmers
- Collaborated with three team members to create iPhone app aimed at helping developers find freelance work

HACK JAM | Participant | Winner "Best App"

September 2014 | UC Berkeley

- Worked with team to create Chrome extension, Squirtle, that allowed sharing of a user's scroll position, text input, and highlighted text using bit.ly
- Used javascript, jQuery, and RegEx for functionality
- github.com/JacobRYoung/Squirtle

SR. WORDPRESS DEVELOPER | Distinct Web

June 2012 - July 2013 | Minneapolis, MN

- Freelance consultant to web design and marketing firm
- Managed backend Wordpress content for three live client sites
- Implemented new functionality using PHP
- Resolved backend and frontend conflicts

Current Projects

iOS DEVELOPMENT

- Currently is an iPhone/iPad app which analyzes ratings and Twitter sentiment for TV shows and movies to develop a comprehensive popularity rating system

WEB DEVELOPMENT

- Working with fellow students in DVCoders, we are developing CSCal, a web app which pulls upcoming tech talks given by Google, Facebook, and Bay Area universities into an integrated calendar
- Can be found at github.com/dvcdoers/club-websites
